

Solution

# CyberProtect<sup>SM</sup>: Microsoft<sup>®</sup> Managed Detection and Response

## Enhance Your Microsoft Security Applications

Many Microsoft and Office E3/E5 licensees are not aware they have fully integrated, highly rated security capabilities. The security tools in the Enterprise license bundles are independently strong and capable but are rarely fully deployed and utilized. With CyberProtect: Microsoft Managed Detection and Response, Fiserv helps you maximize the full value of Microsoft's entire security suite. Using our award-winning solution, you can take your security and compliance to the next level while receiving 24/7 managed detection and response.

### What is CyberProtect: Microsoft Managed Detection and Response and who should use it?

Microsoft security products are leaders in Gartner's Magic Quadrants for Access Management, Cloud Access Security Brokers, Enterprise Information Archiving, Endpoint Protection Platforms and Unified Endpoint Management. If your organization has or is thinking about deploying Microsoft Azure, Office 365 and/or has E3/E5 licenses, this solution is a great fit to maximize the security of your business. Microsoft Managed Detection and Response enhances the value of these industry-leading tools you've already invested in.

## What technology concerns align with CyberProtect: Microsoft Managed Detection and Response?

There is large market demand for Microsoft expertise in maximizing Azure Sentinel and Microsoft 365 investments. If you or your IT leaders have been asking the following questions, it's time for us to discuss Microsoft Managed Detection and Response:

- What is the cost of Azure consumption or cloud migration?
- Should I have elevated concerns about the security of Office 365?
- Should I be thinking about consolidating my security stack for 24/7 monitoring?
- I am concerned about data privacy, what do I do if I don't want data leaving my environment?
- How do I improve compliance using enhanced security tools?
- What can I do to improve alert fatigue with fewer staff and without increasing costs?

## Why choose CyberProtect: Microsoft Managed Detection and Response?

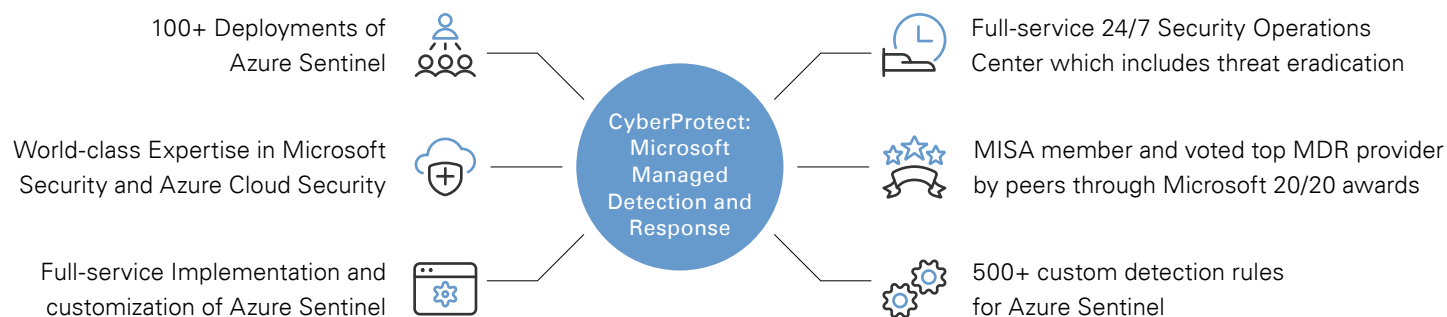

Fiserv provides 24/7 live monitoring of your IT environment. Microsoft Certified SOC analysts detect and respond to threats across the organization around the clock, augmenting staff for organizations already stretched by managing a variety of products and vendors.

**Protect your financial institution with 24/7 monitoring, secure cloud migration and reduced attack surfaces.**

CyberProtect: Microsoft Managed Detection and Response enables:

- Reduced attack surfaces and limited exposure to risks and vulnerabilities
- Customized deployment of Microsoft security tools
- Ongoing platform care and maintenance
- 24/7 security operations center
